

## UP - DOWN SQUEEGEE

Unlike manual applying of solder paste, the AVI - Up down Squeegee is a non-contaminating applier, which provides an uniform solder paste on the stencil regardless of operator skill.

It employs a self locking spring in the applier and this produces a constant pressure on the stencil. Easily, the squeegee holder can be slid along the stencil. Dual angle movement of the applier adds on to another advantages.

### **Features and benefits**

Easy setup of the attachments

Achieve consistency and even solder paste on the stencil at all times.

Dual angle orientation of the handle to facilitate freedom of movement.

Replaceable of the squeezes and squeegees holder.

Variable sizes are applicable with variable respective

### **GENERAL SPECIFICATIONS**

Capacity	1 squeegee and holder
Methods of applying	2 linear directional
Flexibility	Dual angle movement of the handle
Safety Operation	Self locking spring to achieve constant applying pressure
Weight	5 Kg
