

splicing kit includes _____

● A handy splicing tool

● Splicing stickers

Antistatic tool

Pocket size

All size / all pitch

Stickers for
tape of 8, 12,
16, 24, 32
& 44 mm

Available in rolls
(1130 pcs)
or in bags
(single stickers).

Identify the new component reel

Peel off cover film and place the new tape on the splicing tool.

Cut the new tape before the 1st component

Cut finishing tape after the last component.

Splice the cover film (see page 8 for details).

Place the finishing tape on the splicing tool.

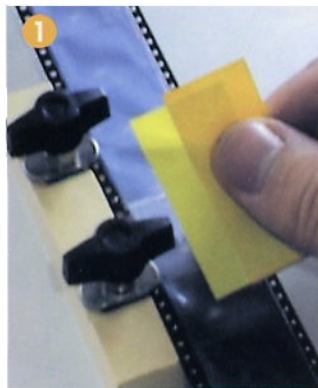

Splice the tape. Start from the edge.

Splice the component tape underneath.
The 2 tapes are now positively joined.

Placing the sticker, step by step...

1 - peel off the first half of the sticker support

2 - place the sticker on the edge of the cover film

3 - peel off the other half of the sticker support
